

<p>Dr Sobhan Y. Tehrani</p> <p>Software Engineering Convener</p>	<ul style="list-style-type: none"> <li>• Male</li> </ul> <p><u>Occupation</u></p> <ul style="list-style-type: none"> <li>• Lecturer at University of Roehampton for Computer Science</li> </ul> <p><u>Goals and Task</u></p> <ul style="list-style-type: none"> <li>• The goal for Dr. Tehrani is to see if his students understand the task assigned. Along with this, the students will need to work in a group and maintain a well-organized environment.</li> </ul>
<p><u>Frustration</u></p> <p>There is an SQL document which is full of data but there is no structure when viewing it.</p> <p><u>Wishes</u></p> <p>Dr. Tehrani would like us to sort a list of data from an SQL file into an according manner of which is stated in the coursework sheet from Moodle. The idea behind this is to have a more structured document, for example maybe listing the different lines of data by size of alphabetical order.</p>	<p><u>Scenario</u></p> <p>When opening the file, you would like there to be some sort of grouping etc which would lead to the user being satisfied when reading the file.</p>
